

COMPANY PROFILE

AL HUDAIFI PARTNERS GROUP

Water, energy, construction and supply for Qatar's industrial sector
— five operating companies, one group.

DOHA, QATAR · SINCE 2001

Five companies. One owner. Independent management.

Al Hudaifi Partners Group (ALHPG) is a Qatari group headquartered in Doha. Since 2001 it has built five operating companies serving Qatar's industrial sector in water and wastewater treatment, treatment chemistry, industrial construction and technology supply.

The milestones reached by our first company are a record of how well our humble beginnings were received. Today the group holds multiple subsidiaries that operate independently of one another, each with its own business objectives and operational structure.

That independence is deliberate. A client contracting with Masa for a steel package deals with Masa's own licence, management and engineers. What the group adds is capital, shared governance and the ability to put several of its companies on one project without a chain of subcontracts.

Guided by a clear vision and the right values, we are positioning the group to take its companies into the world's biggest economies – and to give our partners the satisfaction they deserve.

"When we are blessed with success, it is our duty to walk in wisdom and plan our course to make the best of it."

What we work towards.

OUR VISION

To manufacture and supply high-quality products, perform professional services and support every project from planning to post-completion.

OUR MISSION

To create a competitive advantage through purchasing, manufacturing and distributing products and services that provide superior value to our clients.

HOW THE GROUP WORKS

One group office. Independent companies. Combined where a project needs it.

01

One point of contact

Enquiries reach the group office and are routed to the company that holds the licence for that scope, within one working day.

02

Independent companies

Each company contracts in its own name, with its own management, licence and engineers. The group adds capital and shared governance.

03

Combined on one project

Several group companies can work the same project – from treatment chemistry and equipment supply through to construction – without a chain of subcontracts between them.

Four capabilities, five companies.

Together the group's companies cover a project from treatment chemistry and equipment supply through mechanical works and construction.

WTR

Water & Energy

Water and wastewater treatment technology for industrial and municipal projects, from process train design through installation, commissioning and maintenance.

Protec Trading & Contracting · Nenner Häuser Overseas

CHM

Water Treatment Chemistry

Marine, industrial and specialty chemicals, water treatment and environmental remediation.

Nexus established

Protec Trading & Contracting W.L.L.

One of the biggest players in Qatar's water and wastewater sector.

Protec was established more than two decades ago, initially serving the industrial sector with technological equipment supplies. From small civil and structural works it steadily expanded its capabilities, and today operates with hundreds of experienced engineers and skilled workers, supported by a sales team serving clients across the Middle East and North Africa.

The company focuses on water and energy, providing cost-effective, practical solutions to clients in industrial construction, oil and gas, process, manufacturing, municipal and domestic projects – whether the scope is a single service or a complete turnkey or BOT project.

WHAT PROTEC DOES

- Process engineering and integration
- Water treatment technology
- Solid-liquid separation
- Equipment supply
- Turnkey project execution
- Feasibility studies and consultancy
- Wastewater treatment
- Solid waste management
- Operation, maintenance and remediation
- BOT solutions

CERTIFICATION

- ISO 9001 Quality Management (TÜV SÜD)
- ISO 14001 Environmental Management
- LEED AP – US Green Building Council

Masa Industrial Constructions

Construction solutions tailored to the industrial sector.

Masa delivers structural steel, civil works and plant erection packages for industrial facilities, working as a main or specialist contractor on sites across Qatar.

Its strength lies in understanding each project's particular requirements and delivering customised, high-quality results. From initial planning to final execution, Masa works for precision, efficiency and innovation, and is committed to meeting the specific needs of its industrial clients through long-term partnerships and dependable service.

WHAT MASA DOES

- Structural steel fabrication and erection
- Industrial civil works
- Plant and equipment erection
- Shutdown and turnaround support

CONTRACTING ROLE

- Main contractor
- Specialist contractor
- Sites across Qatar

Nexus Capitals Technology & Services W.L.L.

A technologies supply chain for industrial processes and equipment.

Headquartered in Doha, Nexus represents large manufacturing companies across Europe, the Middle East and East Asia. It contracts with clients to locate and secure the resources they need, and is structured to find, qualify and procure specific resources in industrial water technology, processes and equipment.

Nexus works across four market segments — oil and gas, infrastructure, industrial and commercial — from upstream and downstream fields to power and water plants, airports and harbours.

WHAT NEXUS DOES

- Technology sourcing and procurement
- Environmental services
- Dewatering
- Rental equipment
- Drilling and pipeline process services
- Hydrogeological and geophysical survey

- Chemicals and minerals
- Food and beverage
- Mining
- Hospitals, hotels and stadiums

Nenner Häuser Overseas

German-engineered water and wastewater treatment, delivered across the Gulf.

Nenner Häuser Overseas is the Gulf arm of Nenner Haeuser Process Technologies GmbH, a technology provider for water and wastewater treatment facilities serving municipal and industrial clients worldwide from its engineering headquarters in Hamburg.

Nenner Haeuser is privately owned by people who have dedicated their professional lives to water and wastewater engineering and project execution. Its leadership and engineering teams have overseen the design, construction and operation of more than 100 treatment installations worldwide, using a broad range of technologies.

The overseas company brings the same services and engineering standards to Gulf clients, with local presence, faster response times and knowledge of regional compliance.

WHAT NENNER HÄUSER DOES

- Process train design
- Custom equipment manufacturing
- Turnkey plant solutions
- Operation, maintenance and after-sales
